A Sherry & A Little Plate of Tapas

Kay Plunkett-Hogge

‘Kay Plunkett-Hogge is a great cook, and the best – and funniest – drinking partner a girl could want. Always fun, always feisty – she is a tonic.’

– Diana Henry

Tapas and sherry bars are everywhere: Berlin, London, LA, Paris. Now it's time to bring the trend home and serve this glorious marriage of flavours to friends. In *A Sherry & a Little Plate of Tapas* Kay Plunkett-Hogge tells the story of tapas and its beloved companion, sherry, and offers 80 easy-to-cook-at-home recipes.

The book begins by exploring the mysteries of sherry, considering the five key types, how they're made and how they're served, with tips on the best food and sherry matches and a selection of sherry cocktails. Kay then plunges into the tapas, with chapters on cold tapas – hams and olives and their like – and latillas; montaditos or 'mounted' tapas; pintxos, or 'things on sticks'; and on cooked tapas, with chapters on vegetables, eggs and dairy, seafood and meat. Kay has even created some delicious sherry-based desserts.

Kay Plunkett-Hogge is a cookery writer and broadcaster based in London. She is the co-author of *LEON: Family & Friends* and has worked with Hollywood actor Stanley Tucci on his second cookbook, *The Tucci Table* (Weidenfeld & Nicolson). Her acclaimed book, *Make Mine a Martini*, also published by Mitchell Beazley, was the *Financial Times*'s pick for Drinks Book of the Year 2014 and led to her writing a weekly cocktail column for the *Daily Telegraph*.

40th Anniversary Edition Hugh Johnson

Hugh Johnson's Pocket Wine Book 2017 is the essential reference book for everyone who buys wine – in shops, restaurants, or on the internet. Now in its 40th year of publication, it has no rival as the comprehensive, up-to-the-minute annual guide.

Hugh Johnson provides clear, succinct facts and commentary on the wines, growers and wine regions of the whole world. He reveals which vintages to buy, which to drink and which to cellar, which growers to look for and why. *Hugh Johnson's Pocket Wine Book* gives clear information on grape varieties, local specialities and how to match food with wines that will bring out the best in both. This year's special anniversary edition also contains a colour supplement exploring 40 fascinating stories from cities with great vineyards close by to 'new' grapes that have come on the scene.

Hugh Johnson is the world's pre-eminent writer on wine. First published in 1977, his *Pocket Wine Book* sells hundreds of thousands of copies a year. His winning formula of insight, critical appraisal of the world of wine, plus valuable vintage news and wine recommendations has been often imitated but never bettered.

With the publication of his first book, *Wine*, Johnson established himself at the age of twenty-seven as the most refreshing and authoritative voice on the subject. During the past four decades he has written books that have become landmarks on the subject, including his classic *The World Atlas of Wine*, co-authored with Jancis Robinson, his *Wine Companion*, first published in 2003, and *The Story of Wine*. In his spare time he writes about gardening from his home in London.

42 The World of Plants

Why are trees so big?

LIFE IS AS MUCH A STRUGGLE FOR PLANTS as for others, and the bigger the plant the more likely it is to overcome its competitors and come out on top. By casting shade, and to a much lesser extent hogging water and nutrients, trees suppress other vegetation.

In a garden in abandonment, first annual weeds will cover the ground, then grasses and perennial weeds, followed by brambles. After that, small pioneer trees such as ash, birch, sycamore, mountain ash, pine, sycamore and willow will start to appear.

Pioneer species are often relatively short-lived (50 years or so). As they fall, larger trees will come to dominate: beech, lime and oak, for example. It may take hundreds of years for these 'climate vegetation' trees to reach their ultimate height before beginning a long period of decline. In gardens it is the smaller pioneer trees that are particularly valued: birch, maples and willows being widely cultivated. The plants are best restricted to parks and forestry.

Room to grow
Trees, to the general observer are big things that cast shade and have a single stem from which branches radiate usually at some distance above the ground. However, size is only possible where water and nutrients are available so that acid regions and rocky or mountainous parts are populated by lesser plants, grasses, shrubs, low growing plants that cling to the soil surface and bulbs, corms and tubers.

There must also be a genetic component that also limits the height of trees. No matter how much you water an oak tree (far left) it will never reach the heights of a Californian redwood (left).

And why no bigger?
The taller the tree the greater the exposure to wind damage and snow leverage on the lower parts. To strengthen the lower trunk and base of the tree has to invest as much as eight times as much timber as near the top or tough extremities. At some stage the investment in timber outweighs the benefits and it is no longer 'profitable' for trees to get taller even though by doing so they would shade the competition. This limit is more quickly reached in windy Europe than in calmer Californian valleys for example.

WHERE TO PLANT A TREE
Some soils, particularly clay, shrink as they dry. In summer, trees extract water and soils shrink. Winter rains restore soil moisture, but although the soil swells again, it does not always restore the soil to its original volume. Soil shrinkage accumulates over time, potentially causing damage to nearby buildings. Ideally, you should avoid planting trees close to buildings, and strengthen foundations when building near existing trees.

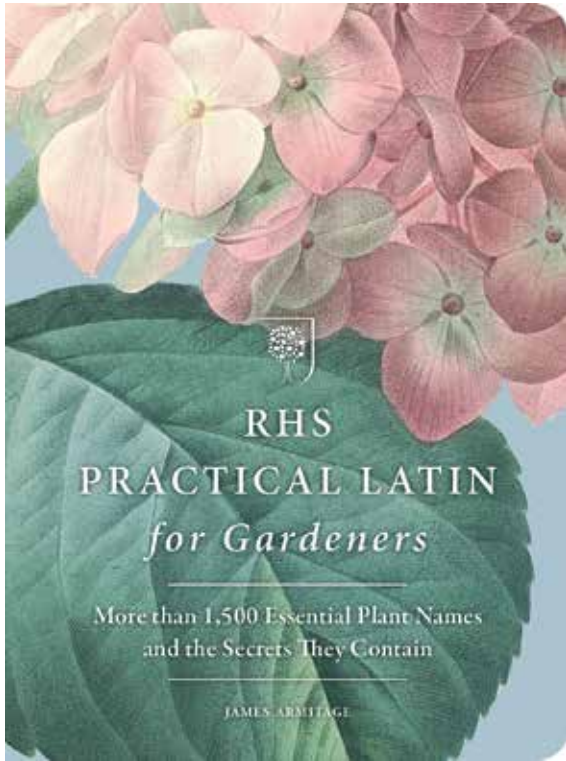

By growing tall, trees literally put shrubs and other plants in the shade. So why don't they just keep growing taller and taller? Because extra growth requires too much timber in the lower trunk and eventually the leaves can no longer suck up enough water.

The 'suction' exerted from the leaves can only lift water so far, and eventually a tree can grow no taller through lack of water.

Why are trees so big? 43

Miller's Art Deco

The Glamour of the Jazz Age Judith Miller

A gloriously illustrated and informative celebration of Art Deco, in the same series as *Miller's Arts & Crafts* and *Miller's Mid-century Modern*.

With its streamlined shapes and forward-looking approach, the Art Deco style still looks modern today. In the 1920s and 1930s, designers and craftsmen made innovative use of both natural and man-made materials to produce elegant pieces that broke with tradition and celebrated the future. In this beautifully illustrated guide, antiques expert Judith Miller explores the key makers and pieces of the movement, explaining what to look for as a collector.

The book contains chapters on furniture, glass, ceramics, sculpture, metalwork, silver and plastics, prints and posters, rugs and textiles. With clear price codes and biographies of key makers and designers, the book also contains "A Closer Look" and "Good, Better, Best, Masterpiece" features comparing ranges of items from makers and factories.

Judith Miller is one of the world's leading experts in the antiques field. In 1979 she co-founded the international bestseller *Miller's Antiques Price Guide* and has since written more than 100 books that are held in high regard by collectors and dealers.

Judith is an expert on the BBC's *Antiques Roadshow* and a regular contributor to the *Financial Times*, *BBC Homes & Antiques* and *House & Garden*.

Dances with Limeys

Living with the British Reginald D. Hunter

US-born observational comedian, Reginald D. Hunter, explores the British nation's favourite topic – themselves – as he reflects on what he's learned in his nearly 20 years as an ex-pat – from the national sport of self-loathing to dealing with 'pedantotrons' (a British person who takes excessive relish in correcting arcane or irrelevant facts).

Before he left the States for the UK back in 1997, Hunter's sister warned him not to be too smiley or friendly – 'they're suspicious of optimism'. He laughed, hugged her goodbye and merrily boarded the plane. One attempt at a chirpy greeting on the London Underground was enough to teach him the truth of his sister's words, with an entire carriage staring at their feet, or at him, in horror.

The ensuing years living among the British have continued to throw up more questions – and occasionally some answers – for Hunter: experiencing weather that is best for suicidal, alcoholic, posthumously-famous poets leads him to ponder whether early Britons committed a cosmic violation that resulted in the punishment of endless rain; while the British tendency to start relationships in a vague, alcohol-induced fashion continues to prove perplexing for someone used to American dating etiquette.

One of the most popular and thought-provoking comedians in the UK, and a regular on TV, Reginald D. Hunter explores the good, the bad and the ugly of living in Britain in this, his first book, *Dances with Limeys*.

Reginald D. Hunter travelled to the UK from his home in Albany, Georgia, aged 27, to study at RADA. He switched to stand-up comedy after doing his first gig on a dare, and is now a well-loved and established figure of British comedy. His three-part documentary for BBC2, *Songs of the South*, about the music of the Southern States of America, aired to critical acclaim in Spring 2015.

Think Dog

John Fisher

A new edition of the classic guide to canine psychology for dog owners.

In the 1980s and 1990s John Fisher revolutionised dog training, first in England, then in the US. With his self-deprecating manner and 'Oh! So British' sense of humour, he taught everyone to 'Think Dog'. In this seminal pet psychology book, he examines the mind of the dog with examples taken from his practical experience, explaining to owners how the world looks to a dog, and setting the standard for canine psychology books henceforth.

Cat Tweets

Trevor Davies

If you love cats and are addicted to Twitter then this is the perfect book for you. With over 50 kitties sharing love (fish), life (sleep, wash, eat) and other meaningful stuff, it is a humorous page turner that you won't be able to put down.

Nowhere is it more apparent that the cat reigns supreme than on Twitter. Having got over the initial disappointment in finding Twitter was nothing to do with budgies, cats have finally taken to tweeting. In the wrong paws the smart phone has been turned into an antisocial network by the dominant feline race. Enjoy their greatest tweets as they point out the failures of other species, the pitfalls of house sharing with humans and other idiots, and where to stick your hashtag.

Trevor Davies has spent many years trying to teach his cat Frazzle to text... he's pretty sure she can, but thinks she simply can't be bothered.

When not playing with Frazzle, for the past 15 years Trevor has been the editor of some of the most successful pet books in the UK and has turned his hand to penning a few, including *Kittens for When Sh*t Happens* (also available in puppy flavour) and *The Little Book of Corgi Charm*. Aside from Frazzle he lives with his wife (who is equally dismissive of him) in Kent.

The Chase Quizbook Volume 2

Have You Got What it Takes to Be a Chaser? with foreword by Bradley Walsh

A Chase quizbook with a difference, this time instead of playing as a contestant, you can see if you have what it takes to join the ranks of the elite Chasers: The Governess, The Beast, The Sinnerman, The Barrister and The Vixen.

Containing a brand new format and new questions from the show, *The Chase Quizbook Volume 2* is the ultimate indulgence for fans of ITV's most popular quiz programme. With a fun introductory section to help you choose your Chaser name, back story and style, you can then make your way through quizzes to see how you would fare as a Chaser. The first round of each quiz is the Initial Test, with questions across a range of categories to judge if you are up to Chaser standard. The next features Chase Scenarios, with you in the role of the Chaser against contestants of differing character traits to play against, and there's a chase grid on the reverse of the jacket for you to track your game. The final round pits you against current Chasers from the show to find out if you can answer the questions that they couldn't, to earn the title of the Greatest Chaser.

Each quiz will give you a rank based on your score through the rounds, so whether it turns out you're more The Pussycat than The Beast, or more The Saint, than The Sinnerman, why not see what kind of Chaser you are?

Giles The Collection 2017

Carl Giles

The bestselling Giles compilation is back for 2017! This year we celebrate the 70th anniversary of the first appearance of that most beloved of characters, Grandma.

Fans of Giles will be thrilled to receive the latest annual treat from the archives of the celebrated cartoonist, whose work won him huge popular admiration and accolades including being voted the best cartoonist of the 20th century.

In this collection, Giles takes a tongue-in-cheek look at the views and antics of Grandma, with 150 cartoons taken from the *Express* and the *Sunday Express* archives. Brilliantly witty and full of irreverent fun, this compilation is the ideal addition to your Giles collection.

Carl Giles was born in Islington, north London, on 29 September 1916. After leaving school at fourteen, he initially trained in animation before moving into cartoons, when working for *Reynolds News*. In 1943 Giles moved to the *Sunday Express* and *Daily Express*, eventually becoming the *Daily Express* "War Correspondent Cartoonist" with the 2nd Army in 1945. Best known for his *Express* "family", his cartoons had enormous popular appeal and in 1959 he was awarded an OBE. Giles left the *Daily Express* in 1989 but continued working for the *Sunday Express* until 1991. He died in 1995.

"They're signing a two-day truce with Grandma. They won't play any Christmas jokes on her if she promises she won't sing"

The Invention of Numbers

Professor Peter Bentley

Numbers are at the heart of the existence of the universe and everything in it, and yet a lot of us have little understanding of their creation, let alone their part in philosophy, art, music, physics, literature, religion and computing.

Professor Bentley's fascinating history of the creation of numbers will unlock the secrets of things we take for granted. From zero to infinity, discover amazing facts; learn about the way they have shaped our world and enjoy the pure beauty of mathematical logic – where numbers seem to take on human characteristics, and can be perfect or irrational, amicable or prime, real or imaginary.

The World Atlas of Wine

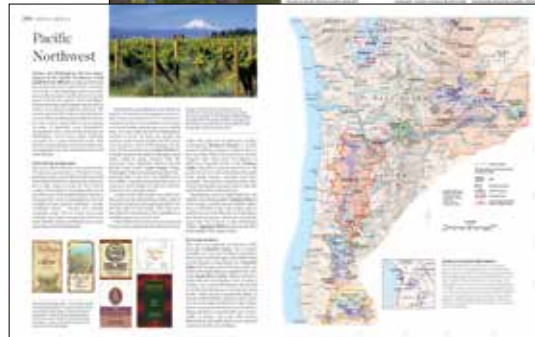

Hugh Johnson & Jancis Robinson

This 7th Edition confirms the status of *The World Atlas of Wine* as the most essential and authoritative wine reference work available. Reflecting the changing nature of the wine scene, *The World Atlas Of Wine* takes into account changes in climate, techniques, fashion and new regulations over the last six years. A fresh new design, a bold new 'infographic' illustration style and stunning new images make the visual appeal of the atlas as strong as its expert, accessible text.
